Never underestimate the importance of local knowledge.

To truly understand a country and its culture, you have to be part of it.

That's why, at HSBC, all our offices around the world are staffed by local people. In fact you'll find we've got local people in more countries than any other bank.

It's their insight that allows us to recognise financial opportunities invisible to outsiders.

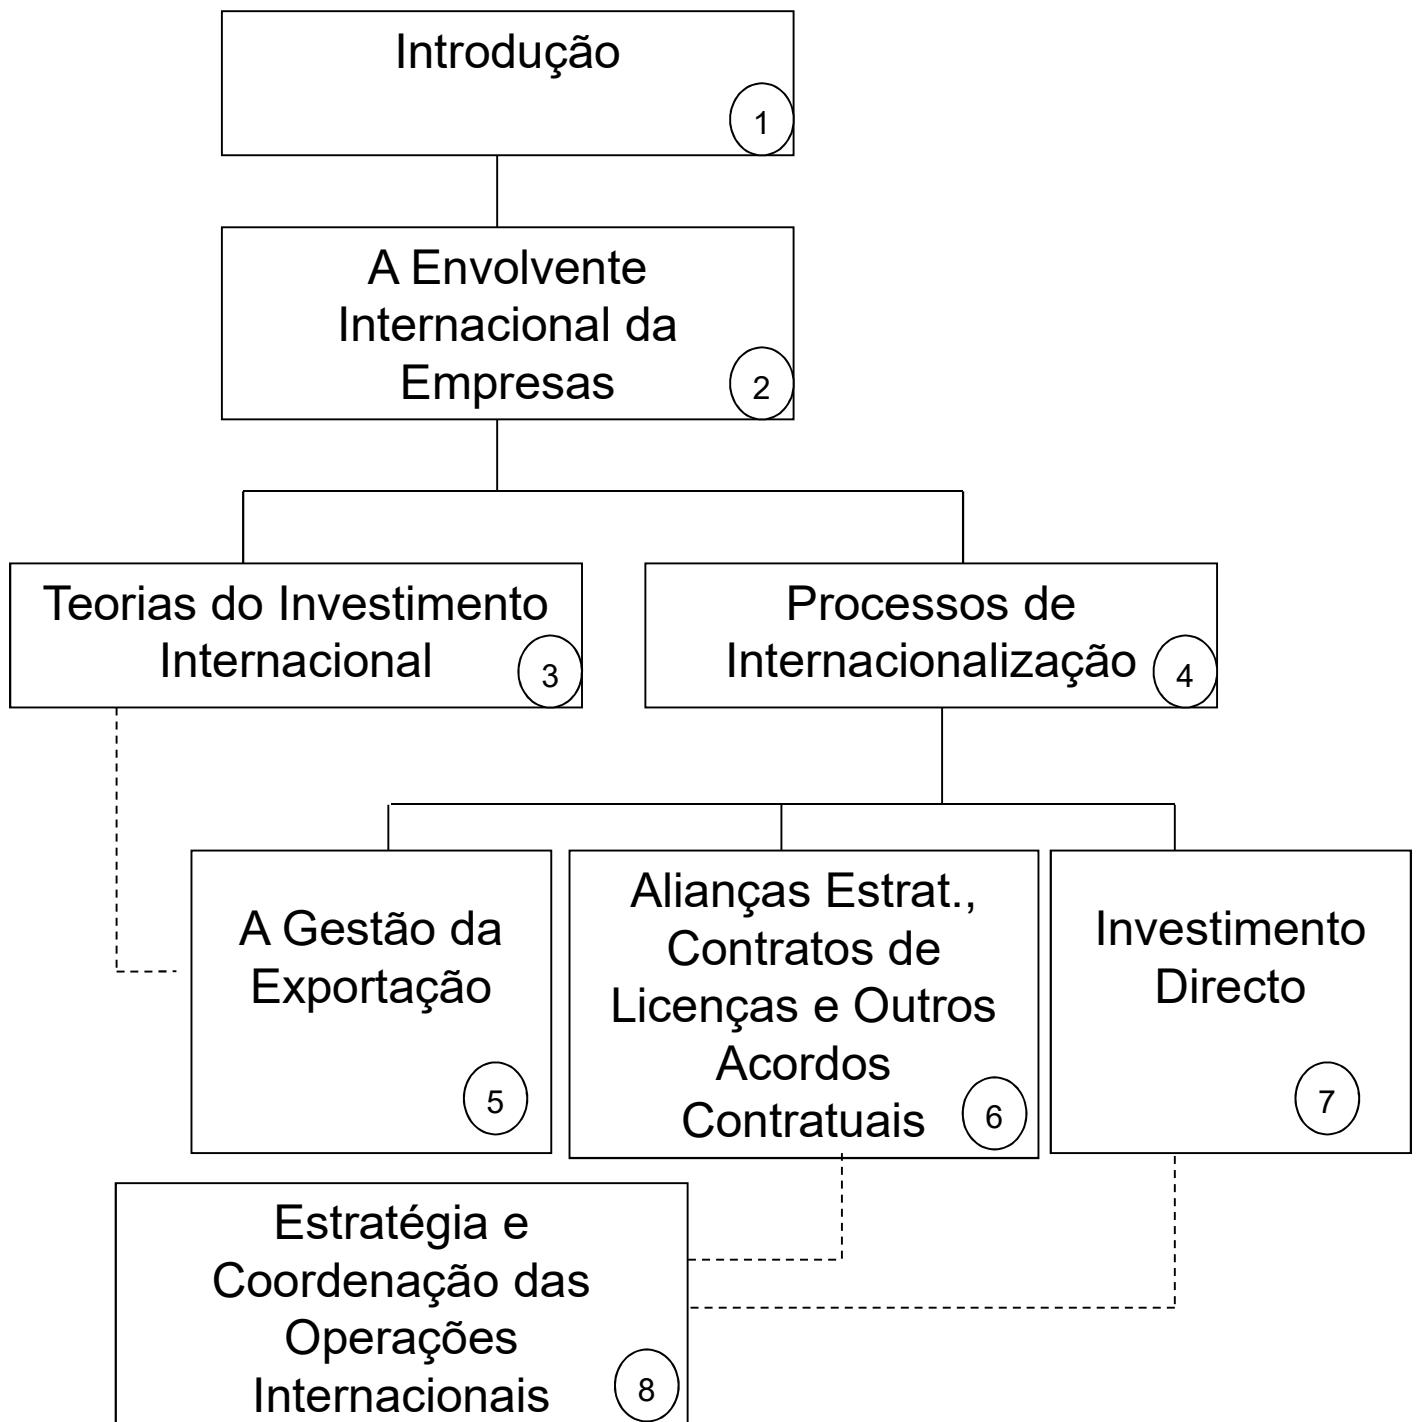

But those opportunities don't just benefit our local customers.

Innovations and ideas are shared throughout the HSBC network, so that everyone who banks with us can benefit.

Think of it as local knowledge that just happens to span the globe.

DEFINITIONS

(I)

1. A **foreign affiliate** is an incorporate or unincorporated enterprise in which an investor, who is resident in another economy, owns a stake that permits a lasting interest in the management of that enterprise (an equity stake for 10 per cent for an incorporated enterprise or its equivalent for an unincorporated enterprise). In the *World Investment Report*, subsidiary enterprises, associated enterprises and branches – defined below – are all referred to as foreign affiliate or affiliates.

DEFINITIONS

(II)

A **subsidiary** is an incorporated enterprise in the host country in which another entity directly owns more than a half of the shareholder's voting power and has the right to appoint or remove a majority of the members of the administrative, management or supervisory body.

An **associate** is an incorporated enterprise in the host country in which an investor owns a total of at least 10 per cent, but no more than half, of the shareholders' voting power.

A **branch** is a wholly or jointly owned unincorporated enterprise in the host country which is one of the following: (i) a permanent establishment or office if the foreign investor; (ii) an unincorporated partnership or joint venture between the foreign direct investor and one or more third parties; (iii) land, structures (except structures owned by the government entities), and/or immovable equipment and objects directly owned by a foreign resident; or (iv) mobile equipment (such as ships, aircraft, gas- or oil-drilling rigs) operating within a country, other than that of the foreign investor, for at least one year.

DEFINITIONS

(III)

2. Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest and control by a resident entity in one economy (foreign direct investor or parent enterprise) in an enterprise resident in an economy other than that of the foreign direct investor (FDI enterprise or affiliate enterprise or foreign affiliate). FDI implies that the investor exerts a significant degree of influence in the management of the enterprise resident in the other economy.
